Your chance for a strong energy investment in Turkey

Turkey is one of the most dynamic economies at the crossroads of Europe and Asia. Significant opportunities are opening up, particularly in the energy sector: Strategically located, with growing energy demand and a strong infrastructure, the country offers ideal conditions for sustainable, high-yield investments.

Our offer: Participation in a secure, long-term energy project with a focus on fuel storage and distribution

We are implementing a highly attractive energy project in the field of fuel storage and delivery within Turkey. This project is being implemented by a newly established company and offers an excellent investment environment in terms of both security and returns.

Our vision is to build a high-performance, efficient logistics and warehousing infrastructure that will make a strategic contribution to the national energy supply – for both residential and industrial customers. The planned corporate structure is a Turkish limited company (Ltd. or Inc.).

1. Wanted: 1–4 strategic investors for a long-term partnership

We specifically invite one to a maximum of four strategic investors to become part of our future-oriented project. Our goal is to build a solid, growth-oriented company with strong partners. Entry is achieved through the acquisition of company shares with clearly defined investment volumes and participation rates:

Company shares (%)	Investment amount in US dollars
10%	10 Mio
15%	20 Mio
20%	30 Mio
25%	40 Mio
30%	50 Mio
35%	60 Mio
40%	70 Mio
45%	80 Mio
49%	88 Mio

Note: Currently, the planned expansion requires up to USD 50 million in capital. The company is 100% debt-free and in the development phase—ideal for investors looking to get in early on a high-growth project.

2. Company valuation (implicit)

Based on the shares and the associated investment amounts, the company valuation is constantly increasing.

The formula for calculating the company valuation (post-money) is:

$$\text{Bewertung} = \frac{\text{Anlagebetrag}}{\text{Anteil in \%}} \times 100$$

Company shares (%)	Investment amount in USD	Implied company valuation USD
10%	10 Mio	100 Mio
15%	20 Mio	133,34 Mio
20%	30 Mio	150 Mio
25%	40 Mio	160 Mio
30%	50 Mio	166,66 Mio
35%	60 Mio	172,42 Mio
40%	70 Mio	175 Mio
45%	80 Mio	177,78 Mio
49%	88 Mio	180 Mio

Observation: The valuation increases with increasing participation – investors receive relatively more share per invested dollar with higher investments → incentive for large investors.

2. Example return calculation

Assumption: The company is sold after 5 years for USD 300 million (exit scenario).

Formula:

$$\text{Rendite} = \left(\frac{\text{Exit-Wert des Anteils}}{\text{Investiertes Kapital}} - 1 \right) \times 100$$

Company shares (%)	Investment amount in USD	Exit value (at USD 300 million)	Profit	Return (%)
10%	10 Mio	30 Mio	20 Mio	+200%
15%	20 Mio	45 Mio	25 Mio	+125%
20%	30 Mio	60 Mio	30 Mio	+100%
25%	40 Mio	37,5 Mio	35 Mio	+87,5%
30%	50 Mio	45 Mio	40 Mio	+80%
35%	60 Mio	75 Mio	45 Mio	+75%
40%	70 Mio	120 Mio	50 Mio	+71,4%
45%	80 Mio	135 Mio	55 Mio	+68,75%
49%	88 Mio	147 Mio	59,Mio	+67,05%

Conclusion:

- Higher percentage returns for smaller investments (higher risk, lower investment).
- Absolute profit is significantly higher with larger investments, but percentage return decreases.
- Ideal for investors with a long-term investment horizon who are looking for value appreciation through exit.

Flexible participation models – tailored to your needs

Depending on your wishes and legal framework, different participation models are available:

- **Individual models:** Depending on the investment volume and objectives, we will work together to develop a suitable investment model.
- **Equity participation:** You acquire fixed shares in the company and receive a corresponding share in the profits.
- **Silent partnership:** Ideal for investors who wish to remain anonymous but still want to participate in the company's economic success.

Our energy project in Turkey

A modern fuel depot with an associated logistics structure is being built under the MINROGROUP-NEW-ENERGIE umbrella brand. The goal is to ensure the safe, efficient, and environmentally friendly supply of fuels such as diesel for industry, commerce, and public institutions.

Why you should invest:

- **Strategic relevance:** Fuel supply is an essential component of the infrastructure.
- **Growth market:** Increasing energy demand in Turkey and the region. Attractive
- **Returns:** Early entry into a highly scalable business model.
- **Legal certainty:** Clear legal structures and investment security.
- **Transparency and control:** direct opportunities for investors to participate.

Conclusion:

This project is aimed at visionary investors who want to not only contribute capital but also actively contribute to the development of a significant energy company in Turkey. If you are interested in an exclusive investment and want to become part of a long-term, strategically important project, we cordially invite you to a personal discussion.

Our reference: We already supply a large number of well-known customers from a wide range of industries – including hospitals, hotels and hotel chains, yachts, construction companies, and numerous other industrial enterprises.
